Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The attorney asked for a clarification of the statements made under 35 USC 101; the examiner stated that as claims 39 and 42-43 are now drawn to a computer with structural limitations, they recite statutory subject matter. The examiner gave a definition of "nonfunctional descriptive material" and stated that as the coordinates recited in the claims do not functionally interact with the claimed computer, they are nonfunctional descriptive material. Possible claim amendments were discussed, but the examiner declined to state whether any suggested amendment would be allowable. Whether PEITSCH actually teaches correct crystallographic coordinates was also discussed. The examiner stated that evidence would help render arguments regarding enablement more persuasive.
